Soon-to-be-deprecated ActiveRecord calls
Methods such as find(:all), find(:first), finds with conditions, and the :joins option will soon be deprecated.
More information: http://m.onkey.org/2010/1/22/active-record-query-interface

The culprits:
- app/models/version.rb
- app/models/package.rb
- app/models/tag.rb
- app/models/user.rb
- app/models/log.rb
- app/models/version.rb
- app/models/tag.rb
- app/models/user.rb

named_scope is now just scope
The named_scope method has been renamed to just scope.
More information:
http://github.com/rails/rails/commit/d60bb0a9e4be2ac0a9de9a69041a4ddc2e0cc914

The culprits:
- app/models/package_user.rb
- app/models/version.rb
- app/models/tag.rb
- app/models/package.rb
- app/models/review.rb
- app/models/timeline_event.rb

Old router API
The router API has totally changed.
More information: http://yehudakatz.com/2009/12/26/the-rails-3-router-rack-it-up/

The culprits:
- config/routes.rb

New file needed: config/application.rb
You need to add a config/application.rb.
More information: http://omgbloglol.com/post/353978923/the-path-to-rails-3-approaching-the-upgrade

The culprits:
- config/application.rb

Deprecated constant(s)
Constants like RAILS_ENV, RAILS_ROOT, and RAILS_DEFAULT_LOGGER are now deprecated.
More information: http://litanyagainstfear.com/blog/2010/02/03/the-rails-module/

The culprits:
- app/views/static/error_404.haml
- app/views/static/error_500.haml
- app/views/layouts/_google_analytics.html.erb

- app/views/layouts/application.html.erb
- app/metal/canonicalize_url.rb
- lib/scripts/weekly.sh
- lib/scripts/tweet.sh
- lib/scripts/update-packages.sh
- lib/scripts/update-taskviews.sh
- lib/tasks/rspec.rake
- lib/tasks/manifest.rake
- lib/crantastic.rb

Deprecated ActionMailer API
You're using the old ActionMailer API to send e-mails in a controller, model, or observer.
More information: http://lindsaar.net/2010/1/26/new-actionmailer-api-in-rails-3

The culprits:
- app/models/weekly_digest_observer.rb
- app/models/user.rb
- app/controllers/users_controller.rb
- app/controllers/password_resets_controller.rb

Old ActionMailer class API
You're using the old API in a mailer class.
More information: http://lindsaar.net/2010/1/26/new-actionmailer-api-in-rails-3

The culprits:
- app/models/digest_mailer.rb
- app/models/user_mailer.rb
- app/models/package_user.rb
- app/models/digest_mailer.rb
- app/models/package_rating.rb
- app/models/user_mailer.rb
- app/models/version_observer.rb
- app/models/tagging.rb
- app/models/package.rb
- app/models/review.rb

Old Rails generator API
A plugin in the app is using the old generator API (a new one may be available at
http://github.com/trydionel/rails3-generators).
More information: http://blog.plataformatec.com.br/2010/01/discovering-rails-3-generators/

The culprits:
- vendor/plugins/sitemap/generators/
- vendor/plugins/sitemap/generators/sitemap_migration/

Deprecated ERb helper calls
Block helpers that use concat (e.g., form_for) should use <%= instead of <%. The current form will
continue to work for now, but you will get deprecation warnings since this form will go away in the
future.
More information: http://weblog.rubyonrails.org/

The culprits:

- app/views/password_resets/edit.html.erb
- app/views/taggings/_form.html.erb
- app/views/users/_form.html.erb
- app/views/layouts/application.html.erb
- app/views/packages/show.html.erb
- app/views/password_resets/new.html.erb
- app/views/sessions/new.html.erb

Deprecated ActionMailer attribute :sent_on
Using the new mailer API, you can specify :date to the mail method.
More information: http://stackoverflow.com/questions/7367185/weird-error-when-delivering-mail-undefined-method-index-for-2011-09-09-2215

The culprits:
- app/models/digest_mailer.rb
- app/models/user_mailer.rb

Deprecated filter_parameter_logging calls
The list of filtered parameters are now stored in /config/application.rb. For example:
config.filter_parameters += [:password]
More information: http://asciicasts.com/episodes/224-controllers-in-rails-3

The culprits:
- app/controllers/application_controller.rb
- app/controllers/application_controller.rb.rails2
